Problem Domain:

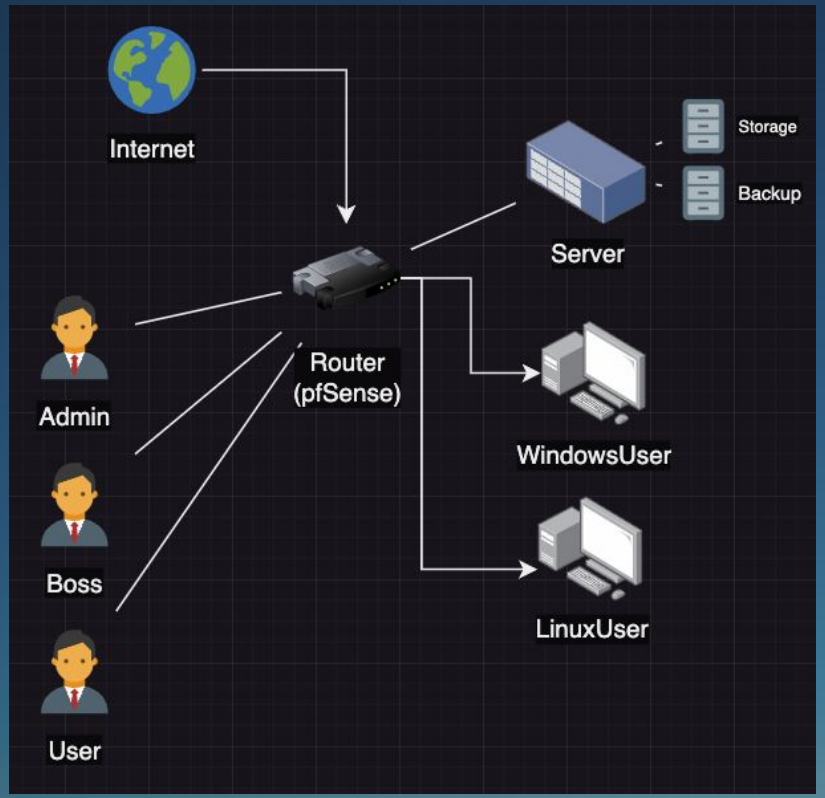
A small CGI company was founded by two high-school friends who started out making videos on their phones. Now they employ a few more artists and a business manager.

- Plans for expansion from home to office.
- Transition from BYOD to company provided devices.
- The employees are proficient in multiple OS's (Linux, Windows, MacOs).
- Consolidate data to centralized location.

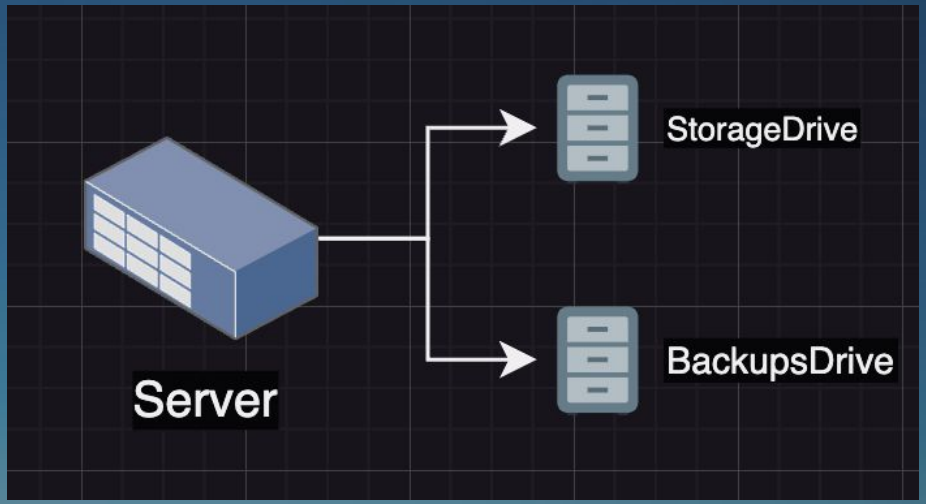
Solutions:

- Ubuntu Server
- Storage Solution
- Automated Backup Plan
- Windows / Linux / Mac ready deployment
- Remote connection capabilities

Network:



Data Storage & Backup Solution:



Demo!
