Raphael Chookagian

- U.S. Army Veteran

- Commercial Fashion Photographer

- Fullstack JavaScript Software Engineer

- Experience with public and in house programs, design, scaffolding and builds.

- International experience working with commercial, civilian and government services.
Problem Domain:

A small CGI company was founded by two high-school friends who started out making videos on their phones. Now they employ a few more artists and a business manager.
- Plans for expansion are to employ additional staff and relocate from home to actual office building.

- Current BYOD method and transitioning to company provided devices.

- The employees are proficient with operating both Windows and Mac OS , but lack any IT skills.

- Working from home, the stop-gap solution has been a poorly organized shelf of external and internal hard-drives used to move data to and from the founders' home.

- Central data storage solution on site at their office.
Solutions

- Ubuntu Server
- Storage Solution
- Automated Backup Plan
- Windows / Linux / Mac ready deployment
- Remote connection capabilities

Network:

Data Storage | Backup Solution:
